Letter of Recommendation

In my capacity as a Chief Technology Officer at Aeon Communication Private Limited, Mumbai, I find immense pleasure in recommending my subordinate Mr. Aditya Naik for the Graduate Program at your esteemed university. I have had the pleasure to know and work with him for the last four years. He first worked with me as an undergraduate intern in the software development organization.

Following his internship and graduation from Symbiosis, I was happy enough to keep a track of Aditya's career so that, when the opportunity arose, I was able to recruit him at his current position at Aeon Communication under my guidance.

Aditya brings to all of his activities energy, enthusiasm and commitment. This is to be expected in any successful member of an entrepreneurial organization and in this regard, Aditya fits well. Be it in the decision making process, parsing an intricate algorithm or the establishment of best practices with an emerging technology, Aditya consistently delivers high quality work for our organization. This speaks about his overall intellect and ability to learn, attributes that will serve him well in his graduate study.

While Aditya is a relatively junior member of our organization as measured by tenure, he soon established himself as an approachable person in the Software and IT domains in which he has worked. He has been ever-willing to work with members of our organization to share his knowledge and expertise, most notably as a presenter of presentations on product functions.

He has a deep-rooted spirit of helpfulness that, coupled with his quick grasp of subject matter, speaks well to his potential as a teaching assistant or instructor.

What I find most engaging in Aditya's character are his wide-ranging interests outside of software. Two of his abiding interests are data science and future technologies. He can be quickly engaged in an in-depth discussion on these topics. Aditya's broad range of interests speaks well in regards to his potential as a researcher, both in bringing a wide range of theory to the research at hand, as well as carrying forward new hypotheses of interest to researchers.

Aditya Naik is a valued and honest member of our organization. Since I am evident to all the aforementioned skills of him during the entire period of his association with me, I hereby give my highest recommendations to him to pursue his higher studies at your prestigious University. I wish him all the best to crystallize all his future goals. Please feel free to get in touch with me regarding this letter of recommendation.

Sincerely,

Name:	Ravi Karmarkar
