Aditya Naik
naikadityavijay@gmail.com

To Whom It May Concern:

I am pleased to give my highest recommendation to Aditya Naik. Aditya was a member of a student team for a capstone project course in Simon School's MS in business analytics program. The project involved quantitative market research, competitive analysis, and marketing strategy development for a start-up offering a cutting-edge employee engagement platform. In client interactions throughout the semester, Aditya demonstrated leadership skills and deep technical acumen. The client was thrilled with the team's work products and recommendations. The client requested follow-on work from Aditya after the course was completed. Such a request is exceptional and speaks to the Aditya's outstanding contribution.

No doubt Aditya will continue this excellent performance throughout his career.

Sincerely,

John C. Handley

To whom it may concern:

It is my great pleasure to recommend Aditya Naik. Aditya arrived at Simon Business School in August 2021 to pursue his Master's in Business Analytics where I had the privilege of getting to know him. The MS in Business Analytics program is designed to enhance understanding of the world of business and equip students and alumni with practice yet effective tools to solve complex business problems. Throughout his program, Aditya immersed himself into an analytics internship at Excellus BCBS, became a Tutor for Predictive Analytics and Modeling, a Teaching Assistant for Predictive and Casual Analytics, a Student Mentor for the incoming business analytics cohort, and a consultant with Simon Vision Consulting that offers pro-bono consulting services to clients.

During our interactions, I was most impressed with Aditya's proactive approach to challenges, his accountability, and his career readiness preparedness. For example, when requesting meetings Aditya delivered a clear agenda of objectives in advance, led the conversation through creation of thought-provoking questions, and set actionable goals to work on independently. Subsequent meetings began with a recap of what had been accomplished and moved into a new challenge he was working to overcome. Within a short period of time, I observed significant improvement in his confidence, direction, and independent execution ability. When he was hired as a student mentor, he brought concepts he learned from his own personal journey to educate other students who were experiencing similar challenges that he previously faced.

In addition, I consistently saw Aditya connecting the dots between his academics and his professional and experiential learning. While discussing his experience as a Consultant at Simon Vision Consulting, it was clear that his prior work experience positioned him well for helping his client develop a go-to-market strategy for a new product. Alongside his team and the new technical skills, he was learned, the client was impressed by the competitive analysis done and was pleased to proceed with a soft launch based on Aditya's presentation and recommendation.

I'm confident you'll be impressed by the knowledge, skills, and abilities he demonstrates. Should you have any questions regarding Aditya you'd like to further discuss, please do not hesitate to contact me.

Best Regards,
Katie

Recommendation for Aditya Naik

Aditya Naik was a student in two of my classes – Analytics Design and Application and Prescriptive Analytics with Python - during his graduate studies in the MS Business Analytics program at Simon Business School. In both classes, the emphasis in on business problem solving in addition to the technical analytics skills and methodologies. We use diverse applications from operations management, finance, supply chain and marketing to allow students to practice applying their technical skills to the entire process of data-driven decision making, including framing the problem scenario, understanding the underlying business needs and assumptions, designing and executing data and analytics projects, and translating their analytics output into business recommendations and presentations to stakeholders. Aditya consistently rose to successfully meet the challenges of his coursework. He was an excellent student and a pleasure to have in class. In particular, in Prescriptive Analytics he submitted one of the strongest final exams in the class.

In August 2022, I hired Aditya to be one of 7 student mentors to the incoming MSBA class of 2023. For the mentor position, I was looking for students with strong academic backgrounds as well as good communication skills and emotional intelligence. Aditya stood out in the interviews as exactly the type of student I was looking to hire. During his time as student mentor, Aditya took a leadership role among the mentors. He worked to organize his mentor peers and to promote the program to the incoming class, going above and beyond what I had asked the group to do. When a group of students came to him, upset and overwhelmed, with a concern about one of their classes, Aditya handled a tense situation with grace and maturity. I was impressed with the way he listened to the students so they felt heard while at the same time helping them to see a different, broader perspective on the situation. I told him at the time, and I sincerely meant it, that he exhibited the qualities we had always looked for when hiring. He clearly showed a personal investment in his work and the vision of the program and organization. He didn't wait to be asked to do something or told exactly how to do it – as soon as he understood the direction we were going he began working to achieve our goals. I offered to write Aditya this letter of recommendation. He will be an asset to whatever organization he joins, and I would not hesitate to serve as a reference for him in the future.

Sincerely,

Elizabeth J. Mohr

Letter of Recommendation

In my capacity as the Head of Procurement at Reliance Globalcom Limited, Mumbai, I find immense pleasure in recommending my subordinate Mr. Aditya Naik for the Graduate Program at your esteemed university. I have had the pleasure to know and work with him during his six month internship under my guidance. He worked with me as a 'Global Network Operations Center Engineer' intern in the organization.

In my analysis, he has the caliber to finish the assigned tasks within the stipulated time frame. Moreover, he displays the indispensable characteristic of being a team member and works efficiently with his colleagues in completing the target in a congruous manner. He also bespeaks strong leadership traits which are reflected in the projects carried out by him.

Aditya has the capability to complete tasks assigned to him with minimum guidance, making him intellectually independent. Within the six months, Aditya worked on various projects in different departments - 'Network Support and Service Group', 'IP', 'Transmission', 'Subsea' and 'Cloud' and was able to grasp knowledge quickly and deliver the best results. His presentations on 'Cable Landing Station' and 'Internet Data Centers' are also commendable.

Aditya was also a part of the IP team working on the Volvo project which included setting up four sites for Volvo with P2P connectivity, VPN and MPLS. This project gave him an insight into the network artitecture, router configuration, fault detection and data security and to my surprise, he was able to understand and provide inputs in discussions with other, relatively senior employees of the project.

In conclusion, I say this with conviction that Aditya is an assiduous person and an adept Engineer. Since I am evident to all the aforementioned skills of him during the entire period of his association with me, I hereby give my highest recommendations to him to pursue his higher studies at your prestigious University.

With Best Regards,

Letter of Recommendation

It is with utmost pleasure and great pride that I am writing this letter of recommendation for Mr. Aditya Naik for admission into the graduate program at your university. Being a partner of Aeon Communication and having mentored Aditya on various projects, I have known him for two years both professionally and personally and hence I have had ample time to analyze, guide and encourage him on his capabilities.

In my observation, he has the capability to complete tasks assigned to him with minimum guidance, making him intellectually independent. At the same time, he shows the rare and essential character to be a team person and work cohesively with his colleagues in achieving the set target.

Aditya is a creative person with a passion for technology. I would like to highlight an application that he developed for Aeon Communication, which allows end users to access thousands of hours of video-on-demand content and live channels, from a Web portal, Android application and the AeonPlay (Android set-top-box). This helped the company approach the market faster with all the readiness and increased the customer viewership by 20 percent in the subsequent month.

He also demonstrates strong leadership qualities. He proved his caliber as an effective team player and leader in the Satellite and Telecommunication Expo held in October 2018. Aditya was able to work with and at times, lead the team throughout the three-day exhibition, be it customer interaction, product demonstration, technology discussion or identifying business opportunities.

Aditya is technically competent and is always looking for ways to convert his theoretical knowledge into practical applications. His projects have earned him much praise and adulation among his team mates. I believe that the courage he has shown to forge his own path sets him apart from the others. Hence, I strongly recommend his candidature for higher studies at your esteemed university.

Yours Sincerely,

Letter of Recommendation

It is my pleasure to recommend Aditya Vijay Naik as a post-graduate student for your esteemed school/ university. Aditya is a graduated alumni from batch 2018, Computer Science from Symbiosis Institute of Technology affiliated under Symbiosis International University.

I know Aditya for the last 4 years as he was my student of more than one undergraduate courses. Describing more about Aditya, he is an optimistic student and was not only good in academics but was also equally contributive to extra curricular and sport activities held in the college. He is an excellent team worker with a kind and polite attitude towards college life.

Hope this might help your greater concern with regards to admission in your institute.

Thanking you for the anticipation,

Yours Truly
